```

Note: if you are working on Mac, you can use the same link, download the MacOS installer and follow the instructions from now on.
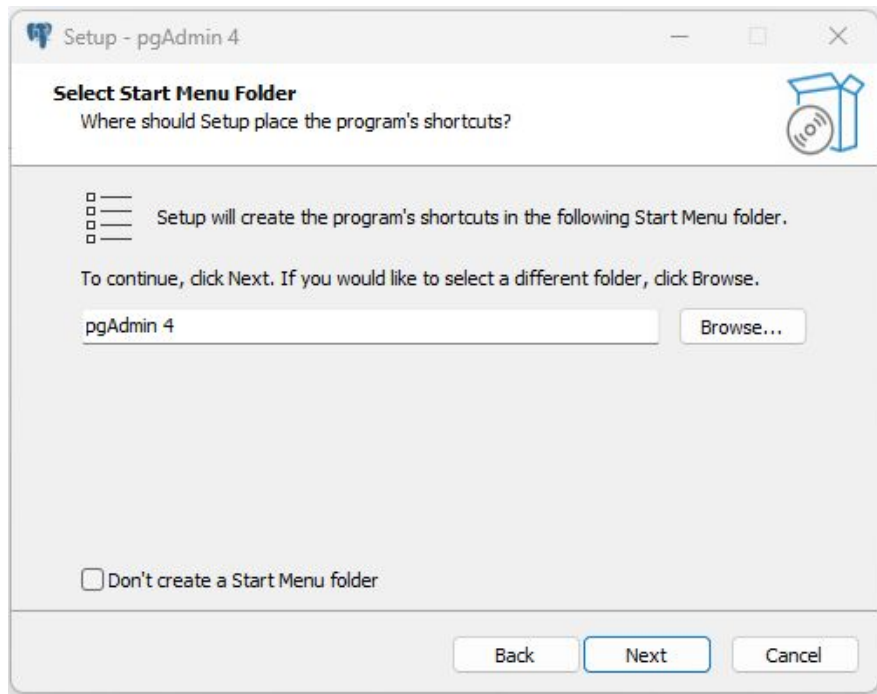

Select the user you want to install PgAdmin in, and start the launcher
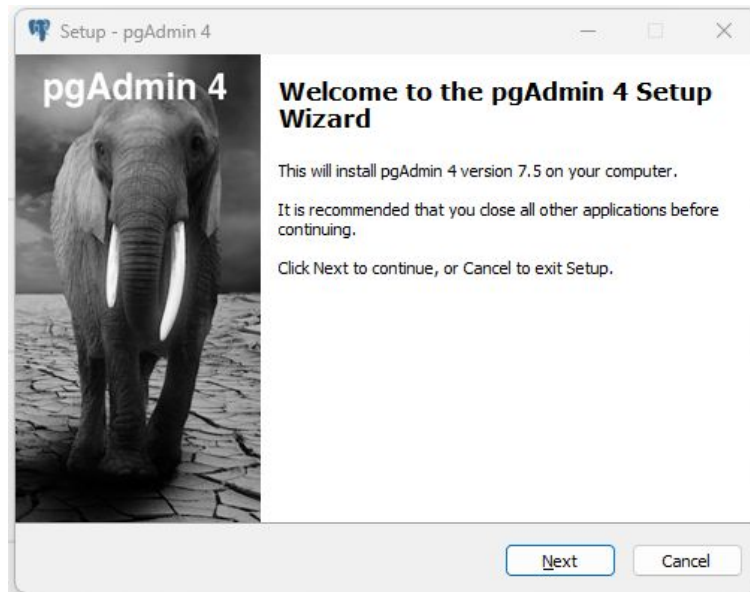

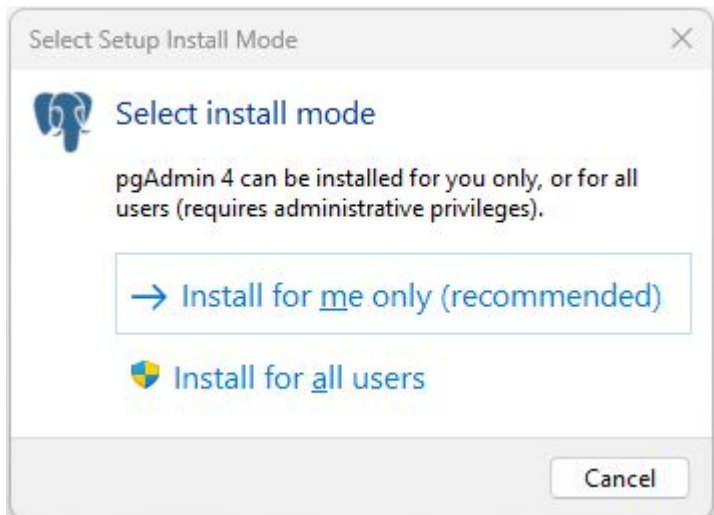

Accept the licence agreement, and select the directory where PgAdmin
will be installed. You can leave the default in place
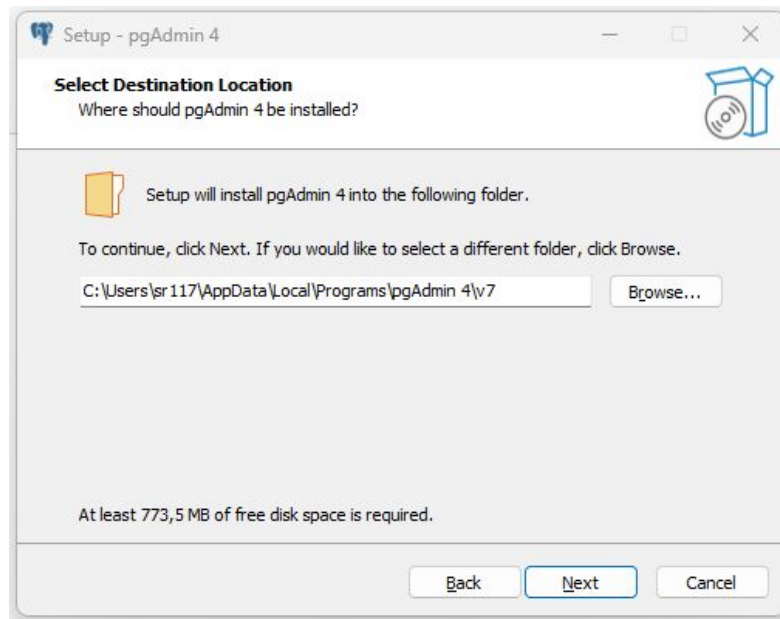

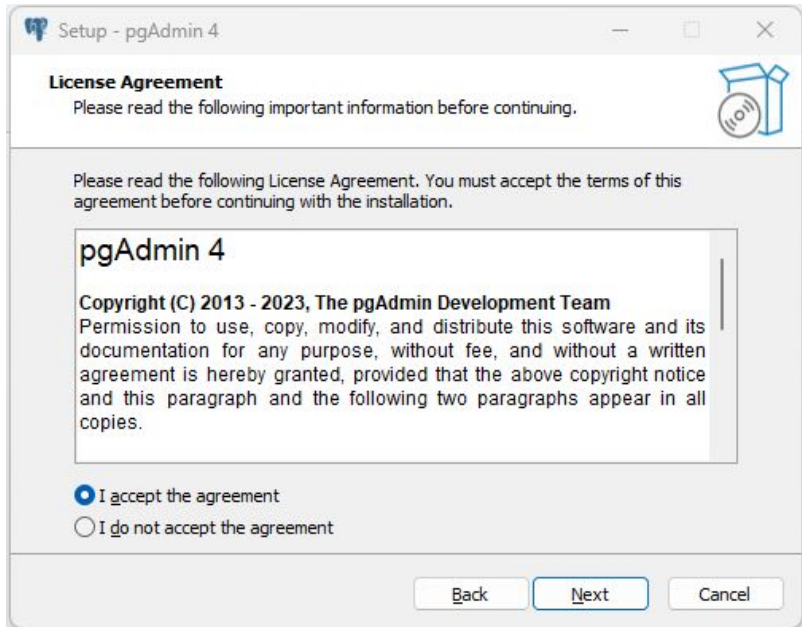

Create the Start menu folder. The default is fine.

You're all set!

Feel free to ask questions and reach out if there are any issues, best of luck and have fun!
